

ABSTRACT OF THE DISCLOSURE

An apparatus for and method of utilizing an Internet terminal coupled to the
5 world wide web to interface with an existing proprietary data base management
system by permitting a developer to create a web based service that produces a
table result. This result can be rendered to the web either by a Cool ICE Script or
by an Active Server Page. The table may appear either as an HTML table or a
graph. The service is defined as a plurality of ordered, discreet, and independent
steps. Each step may be created and/or edited independently of all other steps.
